

POLi Payments Shopping Cart Integration Guide

Shopping Cart: OpenCart

Compatible Versions: 1.5.x

Last Updated: September 2013

Disclaimer:

POLi Payments provides shopping cart plug-ins to simplify the integration process for merchants who use such open source shopping carts. The POLi implementation team will use reasonable endeavors to assist each merchant in setting up their respective POLi Payments plug in. As all such plug-ins rely on third party software, we do not warrant that they are up to date and fully compatible with the respective shopping cart.

Installation Instructions:

1. Backup your version of OpenCart, and any extensions.
2. Copy the downloaded directories “admin” and “catalog” into your installation of OpenCart.
3. If prompted, overwrite any existing files or folders present.
4. Login to your OpenCart admin panel, and navigate to the POLi Payments module in Extensions > Payments.
5. Click the “install” button.
6. Click the “edit” button that will have appeared where the “install” button was.
7. In the admin panel, fill out the following fields:
 - ☐ **Merchant Code** (*this is on your Merchant Account Record attached to your Welcome email*)
 - ☐ **Authentication Code** (*this is on your Merchant Account Record attached to your Welcome email*)
 - ☐ **Currency** – select the currency that you accept POLi Payments with
 - ☐ **Enable POLi Internet Banking** – please ensure you mark this field as “Enabled”

Then click Save.

Please test a transaction by choosing POLi at the checkout of your shop.

Please progress through the transaction using iBank, our fictional test bank.
